Facility requested: USD 32.0 million unitranche term loan

Target closing: 18 December 2026

LTM revenue: USD 96.0 million

LTM EBITDA: USD 14.2 million

Business overview

Kestrel Cold Chain Holdings is a Spanish operator of temperature-controlled warehousing and last-mile distribution serving grocery, pharmaceutical and foodservice customers across Iberia and southern France. The group operates fourteen cross-dock facilities and a fleet of 420 refrigerated vehicles, and has grown revenue at a compound annual rate of 19% since 2022.

Proceeds of the facility will refinance existing bank debt and fund the construction of two automated cold-storage hubs near Valencia and Zaragoza.

Investment highlights

- Contracted, inflation-linked revenue with eight of the ten largest customers on multi-year agreements.
- Defensive end-markets: grocery and pharmaceutical distribution represent 78% of revenue.
- Sponsor-backed by a Southern European infrastructure fund with a four-year holding record.
- Clear deleveraging path as the two automated hubs reach full utilisation by 2028.

Indicative terms

Term	Indication
